innovators of quality, affordable solutions for printing professionals...

efficiency...

reliability...

affordability...

in·nō·vā'tion,
innovatus,

Print in any colour - on any colour!

Why do you need white toner? Well, have you ever tried printing on a black piece of paper? If so, you will know that without the white background, colour is not really visible. This is exactly the same with dark coloured garments, so the TSHIRO+ adds a layer of white which is behind your image which enables you to see your designs over the top of the background colour as well as supporting the latest technology in weed-free media to make production of complex designs child's play.

Standard specifications of the **X-Press OnDemand® TSHIRO+** Printing System
