CMY+White digital printer, a perfect solution for transfer printing onto a wide variety of t-shirts, hoodies and other textiles and hard surfaces as well as white on coloured paper!
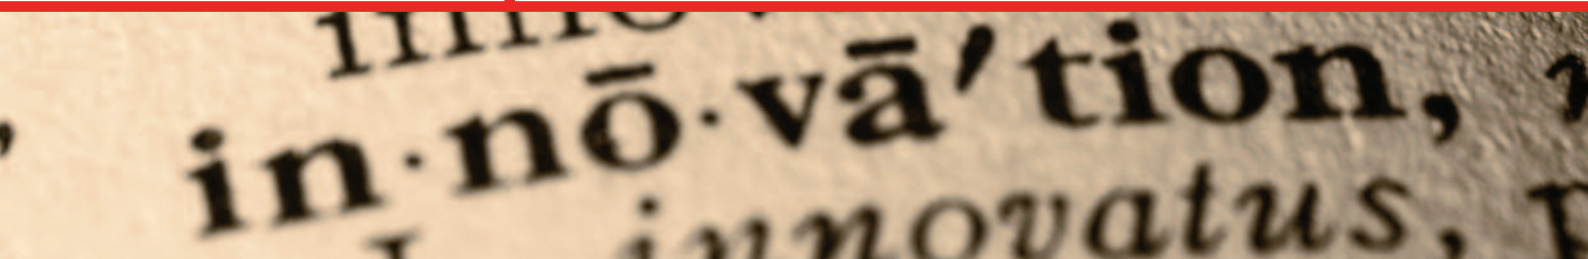

...designed for professional printing

innovators of quality, affordable solutions for printing professionals...

Print in any colour - on any colour!

Why do you need white toner? Well, have you ever tried printing on a black piece of paper? If so, you will know that without the white background, colour is not really visible. This is exactly the same with dark coloured garments, so the TSHIRO A4 adds a layer of white which is behind your image which enables you to see your designs over the top of the background colour as well as supporting the latest technology in weed-free media to make production of complex designs childs play. It also can optionally (at additional cost) print white first for colour on paper and standard cmyk printing.

Standard specifications of the X-Press OnDemand® TSHIRO A4 Printing System
